About Me

I am a motivated Junior Backend and Database Developer with knowledge of database design, backend development, API integration, and system logic. I am eager to learn new technologies, improve my technical skills, and contribute effectively to a development team.

Smart Parking System – Backend & Database Developer

- Designed the database structure and ERD for the parking management system.
- Developed system logic and backend APIs for parking spaces and reservations.
- Implemented database integration, authentication, fee calculation, and QR-based check-in/check-out.
- Worked with the frontend developer to connect APIs and transfer data between the frontend and database.
